Bilateral Meetings

- 09-00 am - 12.00 am
- 14.00 pm - 17.00 pm

Description

SCIO is a research, capacity building and consultancy company that specializes in Knowledge, Innovation and Organizational projects in a varied number of fields from across Science, Technology and Sustainability. SCIO combines the dynamics and creativity of a start-up with the thoughtful analytic mindsets of its senior management team.

SCIO understands itself as a hub in a complex connected flat world ecosystem that aims to facilitate a dynamic and structured response to identified needs and challenges.

SCIO has as its vision to support through its services the advancement of Science, Technology and Sustainability at both, micro and macro levels.

The mission of SCIO is consequently in using its expertise in Knowledge, Innovation and Organizational aspects to support its clients through research, capacity building and consultancy services.

Today's economies and societies are exposed to increasing pressure to adopt in a sustainable manner up-to-date technologies and processes and to generate new knowledge has become a critical factor for economic development and social advancement.

SCIO is addressing this pressure by providing an open infrastructure that allows for a systemic, persistent and dynamic learning and knowledge exchange between local levels and the global level, to peer-to-peer sharing of best practices between local actors, and thus to local empowerment. With this SCIO facilitates and fosters the collaboration of actors from developed countries with developing countries and leading and advanced institutions with starting institutions, and promoting the establishment of new partnerships with stakeholders from across the scientific, industrial and public sectors, and society at large. As such SCIO caters to a diverse number of clients from as well the private as the public sectors, from across the developed and developing world, and from micro entities up to international organizations.
