Bilateral Meetings

- 09-00 am - 12.00 am

Description

BLUEMATER develops and installs water and air treatment systems based on biological processes and / or membrane filtration. Bluemater is interested to improve treatment solutions that use less energy and the absence or the lowest chemical consumables. Bluemater has one patent and one patent pending about air and water treatment processes and is preparing another 3 patents for biological tertiary treatment, algae culture, solid flotation and other.

Offer

Water and air treatment biological tower

We developed a biological tower that can be applied on wastewater treatment processes as well in odor and gas treatments. It's very effective and competitive and is based only in biological processes. Can be applied in new water and gas treatment plants or in the upgrade of installed ones.

Keywords: Biological Tower Water treatment Odor treatment Gas treatment

Cooperation Offered

1. Manufacturing agreement
2. Technical co-operation

Cooperation Requested

1. Investment/Financing
2. Sales / Distribution
3. Outsourcing co-operation
