Bilateral Meetings

- 14.00 pm - 17.00 pm

Description

IsGreen was founded in 2011 to develop and market products to make buildings smarter in energy efficiency.

Its first product, the intelligent lighting system GreenLamp C&C won the first prize of the Energy ISCTE / MIT Portugal Venture Competition.

Following this award progress was made in 2012 a second generation this product more adapted to the current market and economic situation. Now it's marketing is starting up and for which it seeks funding.

Actually we have agreements with Microsoft, using the AZURE platform to better analize the data received from all isgreen devices installed in the customers.

Other commercial agreements : ISQ; EDP comercial, ISEL; ISEP

The main products are:

ILS - Intelligent Lighting System

Adjusts lighting levels to site needs and daylighting

Groups lamp-holders in light islands with dedicated scenarios

SLS - Smart Load Shedding

Turns-off equipment during peak rate

Smooths consumption along time (time of use)

Turns-on equipment when energy is affordable

ICS - Intelligent Comfort & Security

Monitors space usage

Detects anomalous situations

Turns-on equipment and issues warnings by email or smart-phone APP
